Good Morning Mike,

I had a quick question regarding the UCD salmonid temperature work. Betty sent along the attached email and final report dated May 31st (I believe that may have been because the grant/contract was wrapping up on/around that date). However, there was also one last meeting in late June to take any final comments. Do you know if there were additional comments or edits that came in then, or is the May 31st document the final version? I believe it is, but just want to confirm to make sure I have the correct final copy.

Thanks so much,

Terry and Steve,

I spoke with Valentina and she thought one of you was going to stand in for her during her leave. She will be attending this meeting in person but I thought you two should know about it.
